Dear David Healy

Thank you for your email of 7. November 2018 concerning the Nordic Cochrane Centre and where you explain your own story.

I fully agree with you that it is very important to maintain a strong and independent clinical research community, which will contribute to transparency in clinical data and public health in general. In Denmark, we have a long tradition for free and independent research.

The Nordic Cochrane Centre has since it was established in 1993 made excellent contributions to evidence-based decision making in healthcare by producing high-quality independent research and systematic reviews.

The Danish Ministry of Health finances an annual state grant of DKK 17.8 million. The grant is allocated to the Nordic Cochrane Centre in accordance with the terms stated in the Bill of Finances. It is the responsibility of Rigshospitalet to assure the Ministry, that the Nordic Cochrane Centre is being administered in compliance with the terms stated in the Bill of Finances.

I can inform you that the Ministry of Health will continue the state grant.

I can furthermore inform you, that Rigshospitalet is responsible for the administration of the Nordic Cochrane Centre, including employer liability and staff responsibility. The Ministry of Health has no authority in this matter.

I thank you for your concern regarding the Nordic Cochrane Centre. I can assure you that Denmark will remain devoted to ensure a strong and independent research community to the benefit of all – not at least the patients.

Yours sincerely,

Ellen Trane Nørby
